

AI Tower Leasing

Construction is a ways off, but brokers Jones Lang LaSalle have signed on to exclusively market space in the proposed AI Technical Center office building in downtown Hartford.

AI Engineers of Middletown plans to replace WFSB Channel 3's former Broadcast House in Constitution Plaza with a 13-story headquarters tower with 240,000 gross square feet of commercial space. Counting AI and an unnamed tenant that has tentatively signed up for space on the third floor, 30 percent of the tower's office space is committed, said AI CEO Abul Islam.
